RETAIL PRICES AND BASIC WAGE RATES - DECEMBER QUARTER, 1964

CONSUMER PRICE INDEX

The Consumer Price Index measures quarterly, for each State Capital, the variations in prices of commodities and services as affecting a high proportion of the expenditure of wage-earner households. Commodities and services included in the index are food, clothing, drapery, home ownership, rent of privately owned and government owned houses, fuel, light, furniture, household appliances and supplies, fares, motoring, tobacco, cigarettes, beer, cinema, radio and television licences, newspapers, postal and telephone services, hairdressing, dry cleaning, and various other items.

The various commodities and services have been combined into groups; and group indexes are available for Food, Clothing and Drapery, Housing, Household Supplies and Equipment, and Miscellaneous.

The indexes measure price movements in each city individually. They do not provide a comparison of the retail price level in any city with the retail price level of any other city. The base of the index for each city and for the weighted average, six State Capitals, is year 1952-53 = 100.0. Group indexes also have separate bases for each group.

The Brisbane Consumer Price Index for December quarter, 1964, increased by 1.1 per cent from 131.9 to 133.4. The increase was slightly less than the rise of 1.3 per cent which was recorded for the previous quarter. Over the year 1964 the Brisbane index showed an upward movement of 4.1 per cent.

The Food Group, which increased by 1.7 per cent from 138.0 to 140.3, accounted for almost one-half of the quarterly increase in the All Groups index. The rise in the Food Group was due almost entirely to higher meat prices, particularly beef and mutton prices, but the increase from this source was offset to some extent by lower egg prices and a small decline in the price of potatoes. Although the price of bread increased the effect of the increase has not yet been fully reflected in the index as the higher price became effective only in the last month of the quarter.

There was an increase of 0.3 per cent from 118.8 to 119.2 for the Clothing and Drapery Group index. Although there was a slight general upward movement for most sections within the group, the most significant increase was for footwear items.

The Housing Group index increased by 1.0 per cent from 147.2 to 148.7. Increases were recorded for both the ownership and rental sections of the group.

An increase of 0.4 per cent was recorded for the Household Supplies and Equipment Group. The index number rose from 112.3 in September quarter to 112.8 in December quarter. Price increases were recorded for a number of items throughout the group.

There was an increase of 1.5 per cent for the Miscellaneous Group index, with the index rising from 138.6 to 140.7. Higher charges for telephone rental and television licences, together with an increase in the price of newspapers, were responsible for the increase for this group.

The Consumer Price Index increased in all State Capitals except Perth from September quarter to December quarter, 1964. Percentage variations were as follows:- Melbourne, +1.7; Adelaide and Hobart, +1.3; Brisbane, +1.1; and Sydney, +0.9. There was no change in the Perth index. The increase recorded for the weighted average of the six State Capitals was 1.2 per cent.

Since the base year, 1952-53, the rise in the retail price level has been greatest in Brisbane and Hobart and smallest in Perth. Percentage increases from 1952-53 to December quarter, 1964, were as follows:- Brisbane and Hobart, 33.4; Melbourne, 31.8; Adelaide, 28.6; Sydney, 28.4; and Perth, 26.6. The rise in the weighted average for the six State Capitals was 30.0 per cent. (It should be noted that these figures merely indicate rates of price rise in separate cities and do not represent in any way the relativities of actual price levels in the different cities.)

COMMONWEALTH AND STATE BASIC WAGE RATES

Commonwealth and State basic wage rates are reviewed by the appropriate Industrial Authorities from time to time. The last variation made by the Commonwealth Conciliation and Arbitration Commission was an addition of £1 to the male basic wage, with corresponding adjustments to the female and juvenile rates, and operated from 19th June, 1964.

The Queensland Industrial Conciliation and Arbitration Act of 1961 abolished automatic quarterly reviews of the State basic wage, but the Industrial Commission was empowered to vary the wage after a general hearing on the applications of interested parties. The latest of such variations was an increase of 6s. for males and 4s. 6d. for females from 7th December, 1964. Following the release of the December quarter Consumer Price Index an application has been lodged with the Commission for a further increase in the Basic Wage.

Current Commonwealth and State basic wage rates are shown in the following table.

Basic Wage Rates - State Capital Cities

Capital City	Commonwealth Basic Wage			State Basic Wage		
	Males	Females	Date of Operation <sup>a</sup>	Males	Females	Date of Operation
	£ s. d.	£ s. d.		£ s. d.	£ s. d.
